Washington, April 29.—The Federal Reserve Board announced to-day the completion of its plan for a nationwide check clearance system which will permit of the collection of checks drawn on national banks without cost to the payee. The new system will become operative June 15.

Administration officials believe the new clearance scheme will constitute one of the most popular features of the new currency system. Hitherto banks have need the right to charge graduated summ for the collection of checks and the payee always was forced to stand the harge.

The inconvenience and loss resulting

The inconvenience and loss resulting ell largely, it is understood, upon colotors of small checks drawn on distant banks and many larger banks had adopted the custom of eliminating collection charges for the benefit of their regular and important customers.

In many cases banks, officials say, dfd not enforce their charge schedules evenly and the matter never was susceptible of thorough investigation because the Comptroller of the Currency could not insist that a bank charge its customers for collection unless it chose to do so.
